

Facility Management SOP

VWGDS (Demo) — Enterprise Policy Pack

Document ID	VWGDS-SOP-FAC-008	Version	3.0
Owner	Facility & Workplace Operations	Effective Date	01-Apr-2026

This is a fictional demo document created for AI assistant / RAG training purposes. It does not represent an actual Volkswagen Group Digital Solutions policy.

1. Purpose

This SOP defines the standard operating procedures for maintaining workplace infrastructure, seat/cabin allocation, and facility service requests across all office locations.

2. Scope

Applicable to all employees and the Facility & Workplace Operations team managing offices in Pune, Gurugram, and Bengaluru.

3. Definitions

Term	Definition
Seat Allocation	The assignment of a specific workstation to an employee or team based on headcount planning.
PD Head	Physical Deployment Head — the planned occupancy capacity for a given floor/zone.
Reallocation	The process of reassigning seats/cabins in response to changing team headcount.
Facility Ticket	A logged request for a facility-related service such as repair, cleaning, or equipment issue.

4. Policy

Seat Allocation Principle

Seats are allocated based on approved headcount plans with a target utilization of 85-95% per floor to balance flexibility and cost efficiency.

Ticket Response SLA

Facility tickets are categorized as Critical (response within 2 hours), High (same working day), and Standard (within 2 working days), based on issue type.

Reallocation Trigger

Any team headcount change exceeding 10% triggers a mandatory seat reallocation review by the Facility team within 5 working days.

Cabin Allocation

Cabins are reserved for Band D and above employees; shared cabins may be allocated to Band C on a business-justified basis with Department Head approval.

Preventive Maintenance

HVAC, electrical, and fire safety systems undergo mandatory preventive maintenance checks on a monthly cycle, logged in the Facility Management System.

5. Approval Matrix

Scenario	Approval Required
Standard facility ticket	Facility Helpdesk (auto-assigned)
Seat/cabin reallocation	Facility Manager
New cabin allocation request	Facility Manager + Department Head
Capital facility expenditure	Facility Manager + Finance Controller

6. Workflow

- Step 1.** Employee raises a Facility Ticket via the helpdesk portal specifying category and location.
- Step 2.** Ticket is auto-triaged by severity (Critical/High/Standard) and assigned to the relevant vendor/team.
- Step 3.** Facility team resolves the issue within SLA and updates ticket status.
- Step 4.** For reallocation requests, Facility team reviews current occupancy data before reassignment.
- Step 5.** Employee confirms resolution; unresolved tickets escalate automatically after SLA breach.

7. Exceptions

- Life-safety issues (fire, electrical hazard, water leakage near electrical points) bypass the standard SLA and are treated as immediate priority regardless of ticket category.
- Reallocation requests linked to a confirmed organizational restructuring may be expedited outside the standard 5-day review window with leadership approval.

8. FAQs

Q: How do I report a broken workstation or AC issue?

A: Raise a Facility Ticket via the helpdesk portal selecting the appropriate category; Critical issues are addressed within 2 hours.

Q: Why was my team's seating reallocated?

A: Reallocation is typically triggered by a headcount change exceeding 10% or a floor utilization review.

Q: Who approves a new dedicated cabin request?

A: The Facility Manager along with the requesting Department Head, based on business justification.

9. Contacts

Contact Point	Details
